

Seminar and excursion

Seminars and excursions are regularly organized on the third day of AE conferences as an optional event. Every year, the excursion is devoted to one of the topics globally named as "technology and its influence on people and nature in the past and present time". The route of the excursion usually leads through remarkable country sceneries, and technical and historical monuments.

The payment, which is independent of the conference fee, covers transport by a comfortable bus, a lunch in a good restaurant, entry fees, etc.
